LOOKING FORWARD

We are Melbourne's premier service for all things detailing, paint correction, coatings, PPF, tint, mods & maintenance. We are enthusiasts and appreciate the love we all have for our machines. Your car or bike will be in the best of hands and only the best finishes are worthy of such an iconic vehicle.

Preparing your vehicle for the longterm now more than ever your new vehicle needs to be protected. Not only for ease of maintenance but more importantly, to hold the value and keep it looking better for longer.

Why choose Paint Protection? We are GTECHNIQ Accredited Detailers. GTECHNIQ is a composite ceramic paint protection technology that forms a layer of ceramic coating over the surface of your vehicle and it provides the following benefits:

- No More Wax or Polish
- High level of Gloss (Glass-like finish)
- Extreme Chemical Resistance (ph 2 - ph 13)
- Extreme UV Resistance
- Scratch Resistance
- Ultra Hydrophobic & Self Cleaning Properties

Detail Mode offer the most popular and top performing brand out in the market. Why settle for second best when you can get it done right the first time? We don't give false "lifetime" promises, we offer real protection that is tested and proven.

PERFORMANCE UNMATCHED

GTECHNIQ Crystal Serum line is GTECHNIQ's Flagship Paint Protection that offers no compromise in all aspects.

Crystal Serum provides paint protection with previously unachievable levels of gloss, durability, scratch and chemical resistance. Its composite structure offers the ultimate in ceramic protection plus the same slick finish and candy like gloss as the very best carnauba waxes.

The hard 10H top and softer 7H base layer offer improved swirl resistance over standard 9h coatings. Compared to standard ceramic coatings, Crystal Serum forms a relatively thick combined film which greatly reduces surface hazing and improves gloss.

Resistant to chemicals from pH2 to pH13, so when you clean your car, even the harshest wash chemicals will not dull your gloss. And on top of that, contaminants like bird droppings are easy to remove.

THE PERFECT DUO

Imagine a coating with unrivalled scratch resistance, ultra hydrophobic self cleaning properties and unmatched levels of gloss. Its all here with the **Performance + Package**

CRYSTAL SERUM ULTRA 10h 9 YEAR

Key to Crystal Serum Ultra's performance gain is the introduction of a revolutionary new 7nm nanoparticle alongside an existing 20nm nanoparticle, and increasing the ratio of crosslinks which reinforce and thicken the top layer of the coating. Crystal Serum Ultra forms an ultra-durable, high-gloss, slick to the touch, chemically bonding inorganic layer of 9h optically clear ceramic. Once applied, gloss levels will remain in the upper 90th percentile for significantly longer when compared to traditional paint protection products, and cleaning your car will be a breeze.

The hard 10h top and softer 7h base layer offer improved swirl resistance over regular 9h paint protection coatings. Compared to standard ceramic paint coatings, Crystal Serum Ultra can withstand even the strongest wash chemicals and bird droppings.

The high density ceramic layer is resistant to chemicals ranging from pH2 - pH12. This characteristic also makes bonded contaminants such as tree sap, tar, and hard water spots, easy to remove.

The molecular structure of the hard top layer is exceptionally chemical resistant. Crystal Serum Ultra can withstand even the strongest wash chemicals and bird droppings.

CRYSTAL SERUM LIGHT 9h 5 YEAR

Serum Light forms an ultra-durable, high-gloss, slick to the touch, chemically bonding inorganic layer of 9h optically clear ceramic. Once applied, gloss levels will remain in the upper 90th percentile for significantly longer when compared to traditional paint protection products, and cleaning your car will be a breeze.

The high density ceramic layer is resistant to chemicals ranging from pH2 - pH12. This characteristic also makes bonded contaminants such as tree sap, tar, and hard water spots, easy to remove.

Unlike mainstream wax and organic polymer coatings, Serum and Serum Light can resist much higher and lower temperatures. They resist temperatures as low as -4C to as high as +250 C.

EXOv4 ULTRA HYDROPHOBIC COATING

EXOv4 delivers a hard film that makes water-spots easy to remove, offers great resistance to all wash chemicals and can help withstand micro-marring. It produces a high-gloss, warm-looking, extreme hydrophobic finish.

It has a consistent film that is more durable and resistant to road salt and wash chemicals than its predecessors. Application is easy, with a slow flash-off time, giving more time to achieve a perfect finish.

All of the above combined with the introduction of a good degree of swirl resistance means EXOv4 represents a major leap forward in Last Surface Protection (LSP) technology.

Recommended to use in combination with Crystal Serum Ultra and Light for unmatched performance and longevity.

- 18-24 months durability
- Adds gloss, water and ultra dirt repellency

Premium Ceramic Packages

Additional Coatings

Drive Clean

Have your car stand out with unbelievably shiny rims that compliment your entire vehicle. Our wheel armour creates a unique chemical bond over your rims making them dirt and brake dust repellent. The stain and contaminant resistant properties of wheel armour allow them to be much easier to clean, with no hassle.

A single application lasts up to one year. At Detail Mode we remove your wheel and thoroughly cleanse, machine polish and prepare your wheels for the best possible bond.

Gtechniq C5 **Wheel Armour** offers the best protection for wheels, repelling brake dust and contaminants and making them easier to maintain. Because of C5's unique, exceptionally fine surface rheology and chemical bonding mechanism, its performance is outstanding.

FEATURES & BENEFITS

- Shiny appearance
- Dirt and brake dust repellent
- Stain and contaminant resistance
- Easier to clean

Crystal Clear

Formulated to offer the very best dirt and water repellency. One application lasts for up to 12 months. Clear vision glass coating is straightforward to apply and ideal for inner city driving conditions.

With non factory applied glass coatings there is a direct trade off between longevity and repellency. G5 is designed to offer the maximum possible repellency whilst offering reasonable durability.

Water is blown off car screens at speeds as low as 30mph and on vertical glass water rolls off leaving a virtually spot free surface. G5 coated glass will stay cleaner for longer and any contaminants such as bugs and ice will be much easier to remove.

FEATURES & BENEFITS

- Shiny coating
- No water or dirt marks
- Water slides right off
- Keeps your windscreen cleaner for longer

Trim Protect

Trim Restorer is a nano composite coating restores trim to 'as new' condition without altering gloss level. Strong UV absorption filter and chemical bond ensures maximum durability with a single application typically maintaining a flawless finish for up to two years!

C4 utilises a chemical bond to become an extension of the plastic molecule it is protecting.

The coating swaps part of its molecular structure with the surface molecules of your car's trim. This means that you have a protective coating of unparalleled durability.

Unlike many trim products on the market, C4 is exceptionally thin (circa 30 nanometers) optically clear film – this means it will not add an unattractive gloss finish to the surface. Instead, it restores all, but the most faded trim to an 'as new' condition. It is ideal for new trim, helping to prevent fading.

FEATURES & BENEFITS

- Restores trim to "as new" condition
- Provides thin clear film - does not add sticky gloss
- Up to 2 years durability
- Stain and contaminant resistance
- Easier to clean

Guardian

I1 Smart Fabric AB protects all kinds of fabrics from water-based stains. It is breathable and extremely durable, thanks to Gtechniq's unique scientific formula.

With added Biocote® antimicrobial technology, treated surfaces will kill 99% of bacteria. Making it ideal for use inside your car to protect you and your family from harmful germs.

***From: \$230 +gst**

Smart Fabric is colour safe. Nano particles that make up I1 Smart Fabric coat each fabric fibre individually, leaving the texture unaffected, allowing the material to breathe. This means stale air will still be able to escape, while repelling water and oil-based liquids.

Even more hydrophobic than its predecessor, I1 Smart Fabric V2 leaves no remnants of a spillage and moisture simply falls off a coated surface. Laboratory testing reveals that I1 V2 repels water to the highest standard set by the American Association of Textile Chemists and Colourists (AATCC) – ISO 5. And wash tests reveal the product remains at its full performance level after being washed on a 40 degree cycle, and even after five washes still performs better than its predecessor.

On average I1 will last on a car's interior for between 6 and 12 months - depending how 'used' the surface is.

Defence

Hexis Bodyfence at the cutting edge of technology,

Paint Protection Film. The ultimate in defence against harsh driving conditions, With the undeniable performance of Hexis Bodyfence installed on some of the most valuable vehicles across the globe we have brought it here to you.

#HexisBodyfence

Key benefits of PPF are

- o Stone Chip / Scratch Resistance
- o Self Healing
- o Hydrophobic
- o UV Repellent
- o 10 year warranty
- o Gtechniq Halo PPF flexible film coating

Vortex Ceramic

State-of-the-art manufacturing capabilities make it possible to deliver a film that offers unprecedented heat rejection, increased glare control and outstanding UV rejection. With several different shades to choose from, this nano ceramic film will keep the inside of your car significantly cooler, for ultimate driving comfort. You'll also be driving in style and get all the privacy you need.

Features and Benefits:

- Advanced ceramic technology rejects up to 96% of infrared rays
- Total Solar Energy Rejection up to 65%
- Blocks more than 99% of skin-cancer-causing UV rays
- SPF 285+
- Signal-friendly so it won't interfere with mobile phones, GPS navigation, satellite radio and other electronic devices
- Increased safety – keeps shattered glass together
- Helps reduce fading
- Rich black colour, minimising uncomfortable glare
- Many shades available from dark to light, accommodating any driver's preference
- Limited lifetime warranty

When you want the very best for your car or bike Detail Mode delivers. We pride ourselves on our integrity and uncompromising standards
